ABOUT US

Your Trusted Paver Experts [mission / vision]

Diamond Pavers specializes in cleaning, repairing and sealing outdoor pavers, resulting in a beautiful outdoor living space for years to come. From patios and pergolas to pool decks and driveways, ensure that your landscape remains pristine and protected from Northeast Florida's harsh outdoor elements with only the highest quality sealers for stone and pavers on the market.

Professional Pavers at Your Service [value proposition]

If you're looking for an expert job done right the first time, look no further than Diamond Pavers. Have peace of mind that every square inch of your outdoor investment is properly installed, cared for and treated with our proven process and only the finest products available.

SERVICES

Paver Sealing

Protect, restore and beautify your outdoor space with superior paver sealing. This proven method not only enhances the natural color of the paver, it provides a durable, protective layer against staining, mold, algae, insects and weeds — all of which can run rampant in Florida's heat and humidity. Left unprotected, pavers can wear and lose their lustrous finish, allowing harmful outdoor elements to spread, causing further damage to your investment. Bring your pavers back to life with our proven process!

- **CLEANSE** [Commercial Pressure Washing & Mild Acid Wash]

In order to restore your pavers to a like-new condition, we prep for the sealing process by treating for stains, discoloration and excess dirt in the paver joints with a gentle, yet effective commercial pressure washer. If needed, we also apply

a mild acid wash to treat any salt deposits that may mar the appearance of your beautiful space.

- **SAND** [Paver Joints Re-Sanding]

Once the pavers have been thoroughly cleansed, a coarse, wet sand is properly worked into the joints for optimal density and stabilization, resulting in an ultra-smooth surface.

- **SEAL** [Two-Part Urethane Sealer]

Following the removal of any loose particles or debris, two coats of a state-of-the-art urethane sealer is applied to protect and lock pavers in place, keeping weeds, mold, algae and insects out. This advanced treatment gives your pavers a flawless, wet (not glossy) appearance.

Paver Installation

Upgrade your outdoor living space and instantly increase the value of your home with professionally installed pavers. From design implementation to product selection, our expert installers offer a keen attention to detail and are available to assist with your one-of-a-kind outdoor renovation every step of the way.

- **Driveways**

Enhance the allure of your home right at the entrance and allow vehicles to arrive with ease. A beautiful brick paver driveway offers an elegant first impression of your property and unparalleled curb appeal.

- **Patios & Walkways**

Spruce up your landscape and ensure a picture-perfect patio or walkway with decorative, yet fully functional brick or stone pavers. Whether gathering around the fire pit or basking in a warm summer day, homeowners can rest assured that their new outdoor space is both gorgeous and durable over the long-term.

- **Pool Decks**

Construct a new inground pool deck or remodel your existing one with low-maintenance, long-lasting paver installation. A coping paver with superior grout and bonding agents is also recommended to help protect your pool's border from the elements.

Paver Repair

In order to keep your pavers in prime condition, they may often require a bit of upkeep or repair. Whether they're cracked, chipped, broken or off-balance, our professionals are on hand to repair or replace any pavers that require a bit of TLC.

- **Damaged Pavers**

Chipped or cracked pavers can result from age or issues due to excess weight, weather erosion or accidental mishaps. These can be easily fixed or replaced.

- **Uneven Pavers**

Sometimes when pavers become dislodged or askew, they will need to be adjusted or replaced. On occasion, pavers can settle due to natural environmental changes, water erosion or expanding tree roots. When this occurs, the ground can be re-leveled to correct the problem.
